

Unbelievable... it's no bigger than a USB key!

It's the smallest, most sophisticated, best value for money GPS speed camera warning system available today... Comprising the very latest GPS technology, the INFORAD K2 like its predecessor the K1, this product is part of the new breed of products of road legal driver safety aids - «Linea Rossa by Inforad».

N°1 in GPS accuracy - a real revolution!

Beyond its miniature size, the K2's cutting edge SiRF Star III GPS technology gives it industry leading pinpoint accuracy at the lowest possible price... Retailing at an astounding £49.99 - lower than the cost of a speeding fine - the K2 includes free lifetime updates to INFORAD's renowned and validated speed camera database. There is nothing on the market to beat it!

INFORAD K2 - a 'Must' for all safety conscious drivers

With ever increasing speed camera density and traffic, any device that makes for safer drivers while saving money is always welcome.

The K2's small, compact size coupled with its low weight means it easily clips to your windscreen, your rear view mirror, even your car's sun visor. Its on board rechargeable battery removes the need for cumbersome cables and mounting brackets.

Benefiting from the highest level of technology, In particular it has a built in re-chargeable battery and its processor is the GPS SIRF starIII the No.1 GPS satellite chip set technology. The power and quality of this technology inside the K2 has put us as the leader in the GPS product market.

In the world of GPS speed camera detectors, the K2 is compatible with all vehicles. With its size and quality, we are without a doubt an evolution in consumer products.

INFORAD Ltd has lead the way with our other products since 2004 (V1, V2, V3, V4e, K1), but today the K2 is next generation must have safety system...

*Linea Rossa by Inforad :
Design, stylishness, and... legal*

The INFORAD K2 is the second product of a new line of distinguished and esthetic products "Linea Rossa by Inforad" is associated with highest technology.

The INFORAD K2 now includes a volume control to allow the personal setting of low, medium or high to your own requirements, thus making your driving and safety experience extremely pleasurable.

"Linea Rossa" product line continues to be recognised at a glance to be one of that offers highest quality products and technology available anywhere today.
